

Rubik's cube Inside 3 Minutes

STEP 10 – ORIENTATING TWO EDGE PIECES

If all the pieces are in the correct orientation, we have finished Step 10 and completed the Cube. If not, then two (or four) of the edge pieces may need to be re-orientated. The following sequence of moves re-orientates two edge pieces: top-left-middle and top-right-middle:

1. Rotate the top face left (anti-clockwise)
2. Rotate the front-back middle slice to the front
3. [Perform this pair of moves four times in total]
4. Rotate the top face right (clockwise)
5. Rotate the front-back middle slice to the front
6. [Perform this pair of moves four times in total]

Rubik's cube Inside 3 Minutes

STEP 10 – ORIENTATING TWO EDGE PIECES (cont)

If all four edge pieces needed re-orientating, you will now need to turn the cube over and repeat the process.

Congratulations! You have completed Rubik's cube.
